

**UNIVERSITY OF LOUISVILLE PHYSICIANS SELECTS SHAREABLE INK  
TO IMPROVE PATIENT CARE THROUGH CLINICAL DOCUMENTATION ENHANCEMENT**  
*Shareable Ink Prepare Organization for Pay for Performance*

**Nashville, TN and Louisville, KY** (May 8, 2014) – Shareable Ink®, an enterprise cloud computing company that transforms point-of-care clinical documentation to structured data and analytics, today announced that [University of Louisville Physicians Inc.](#) has selected Shareable Ink’s Anesthesia Cloud and ShareMU for 45 of its providers across 20 operating rooms. This implementation will include interfaces to University of Louisville Hospital/Kentucky One systems. As a part of the selection process, Shareable Ink was required to pass the organization’s risk assessment.

Shareable Ink’s Anesthesia Cloud takes advantage of a physician’s familiar workflows and forms. Checklists and alerts are embedded into the digital versions of the forms providing immediate feedback and information to the provider at the point of care. Reports can be prepared quickly and easily from the data collected on those forms, helping hospital and practice managers uncover new insights into operational, efficiency, and quality metrics.

University of Louisville Physicians anesthesiologists and their care teams will now use Shareable Ink’s pen to document data digitally by entering information directly onto electronic versions of forms they already are using. The data will then be immediately available to any of their providers who need access to treat a patient. University of Louisville Physicians will also participate in ShareMU, Shareable Ink’s Meaningful Use program for anesthesiologists.

“Clinical documentation enhancement is going to be key for us as we make the shift to pay-for-performance,” said Dr. Mark Boswell, chief of anesthesiology for University of Louisville Physicians. “Shareable Ink will provide us the tool for better documentation, enabling us to offer better patient care, with improved safety and outcomes.”

University of Louisville Physicians is the largest, multispecialty physician practice in Louisville with nearly 600 primary care and specialty physicians in more than 78 specialties and subspecialties and 1,200 staff professionals. These nationally renowned physicians treat patients of all ages and stages of life, from prenatal care to the senior years.

“University of Louisville Physicians is focused on promoting and enhancing the health of the community,” said Laurie McGraw, chief executive officer of Shareable Ink. “The demands on the anesthesia market are increasing and require advanced technology to meet changing requirements while improving outcomes. Shareable Ink is very proud to be partnered with University of Louisville Physicians. ”
